Objectives are to develop:

- A visionary, performance-based RTP by creating a broad regional framework for economic development, trade, tourism, environmental protection, and community development.

- A technically comprehensive and forward-looking RTP to achieve the diverse benefits of investing in multimodal transportation infrastructure and services.

- An RTP that promotes regional opportunities and celebrates the region’s culture and history.

- A public-friendly and visually appealing RTP using national best practices for RTPs.

 addressing plan, working in a teaming environment, communicating, and making decisions jointly. The transportation plan focuses on understanding community needs and wants, and how they can be met through a collaborative process. The community engagement effort is taking place in several phases:

0. Preliminary
1. Planning
2. Design
3. Construction
4. Operations
5. Maintenance
6. Evaluation
7. Reporting
8. Feedback
9. Improvement

The transportation plan is a comprehensive strategy that addresses the needs of the transportation system and the community. It is a long-term plan that focuses on the future needs of the transportation system and the community. It is a plan that is developed in collaboration with the community and that is based on a thorough assessment of the transportation system and the community's needs.

The transportation plan is a comprehensive strategy that addresses the needs of the transportation system and the community. It is a long-term plan that focuses on the future needs of the transportation system and the community. It is a plan that is developed in collaboration with the community and that is based on a thorough assessment of the transportation system and the community's needs.
